

# High Service Network Cryptographic Server

## FEATURES:

- Maximum security guarantees for encryption applications.
- High speed cryptographic calculation (encryption, digital signature, secure keys generation)
- KEYS safe storage and custody, protected by certified anti-intrusion mechanisms (TAMPER RESISTANT)
- Inviolability before manipulation and intrusion attempts.
- Serial port communications capabilities for keys import/export functions.
- EMV Pin-Block & scripts for banking environments.
- Up to 4.096 bits Asymmetric Keys Operations.
- Native API & PKCS#11 to develop cryptographic based applications.
